**Re: Dr Nikolaos Plevris**

This is to confirm that Dr Plevris was an Honorary Clinical Research Fellow in our Department for 6 months from September, 2015 to February, 2016.

During this time, he undertook the duties of a Clinical Research Fellow within the Department, which involved attending theatres, clinics and covering the ward, as well as on call duties. During this period Dr Plevris proved himself to be an outstanding clinician and doctor. He had good knowledge of gynecological oncology and showed good clinical judgement. He immersed himself in all of the Departmental activities, working extremely well with all the senior and trainee doctors, as well as nurses and secretaries. In addition to seeing new patient referrals, arranging appropriate investigations, optimizing patients for surgery and then assisting in a wide range of laparoscopic and open surgical procedures, many of which were classified as either radical or ultra-radical. He showed good fundamental surgical skills, signifying great potential as a future Gynae Oncology Surgeon within the specialty. His communication skills were outstanding and he liaised well with all members of the Department, as well as patients. In addition, he was a kind and caring doctor, always wanting what was best for patients and was extremely well liked by all the patients.

Dr Plevris was a dependable, reliable and professional doctor at all times, aiming for the highest standards of care. I am sure he will do extremely well in his future career.

Yours sincerely,

**Mr R Naik**

To whom it may concern:

It is my great pleasure to write a letter of recommendation for **Dr. Nikolaos Plevris** following his visiting fellowship at Columbia University Medical Center in New York City and the Valley Hospital in Ridgewood, New Jersey. Nikolaos spent six weeks on our gynecologic oncology service. My partner and I have a busy academic and private practice, seeing over 800 new patients a year and performing over 500 surgical cases annually. We offer comprehensive care for women with gynecologic malignancies and specialize in minimally invasive and robotic surgical techniques for endometrial, ovarian, and cervical cancer. Having worked with residents for the past eleven years, I can say, without reservation, that Nikolaos is a gifted young physician who has a dynamic personality and a great sense of compassion. He integrated seamlessly into our practice and was a pleasure to have in the office and in the operating room.

Though Dr. Plevris was with us only a brief time, he was able to see a wide variety of gynecologic cancer patients in the office and partake in advanced laparoscopic, robotic, and open surgical cases. In this short amount of time, it became clear that Nikolaos is an excellent clinician and will be a gifted surgeon. He will bring home a wealth of laparoscopic and minimally invasive surgical skill.

Most importantly, Dr. Plevris is a physician with a wonderful combination of clinical, surgical, and interpersonal skills. He worked effortlessly with fellow staff and was adored by patients and their families. He proved a caring physician who listens to patients and takes great interest in them as individuals. He is always empathetic and I feel privileged to have had him care for my patients. Dr. Plevris brings a great deal of energy, optimism, and vitality to the practice of medicine. He will be a great contributor to the field of gynecologic oncology and to women's health in the future. He has my highest recommendation as a physician and surgeon.

Sincerely,

William M. Burke, MD
